

Documentation

This documentation contains the brief description of the functionality of each page.

Home page

A. Login Page Documentation:

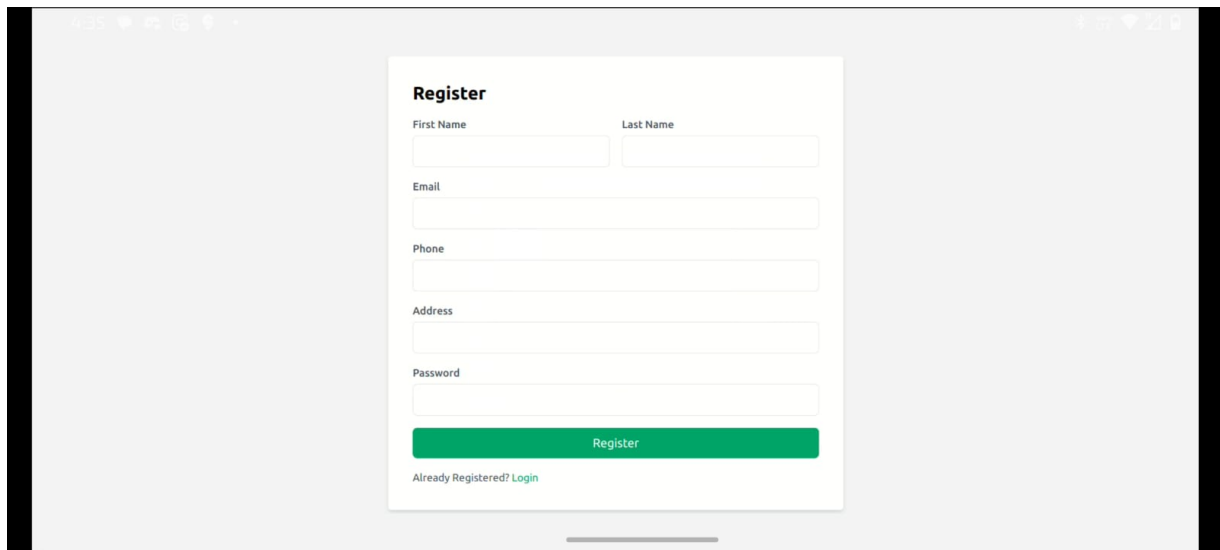

Purpose: The login page serves as the initial point of entry for registered users, allowing them to access personalized features and account information.

Key Features:

1. Username and Password Fields:

- Users enter their registered username and password for authentication.
- Passwords are encrypted to ensure secure transmission and storage.

B. Registration Page Documentation:

A screenshot of a mobile application's registration page. The page has a light gray background. In the center, there is a white card titled "Register". Inside the card, there are input fields for "First Name", "Last Name", "Email", "Phone", "Address", and "Password". Below these fields is a green button labeled "Register". At the bottom of the card, there is a link that says "Already Registered? Login". The top of the screen shows a status bar with the time 4:35 and various icons.

Purpose: The registration page allows new users to create an account, providing them access to personalized services and features.

Key Features:

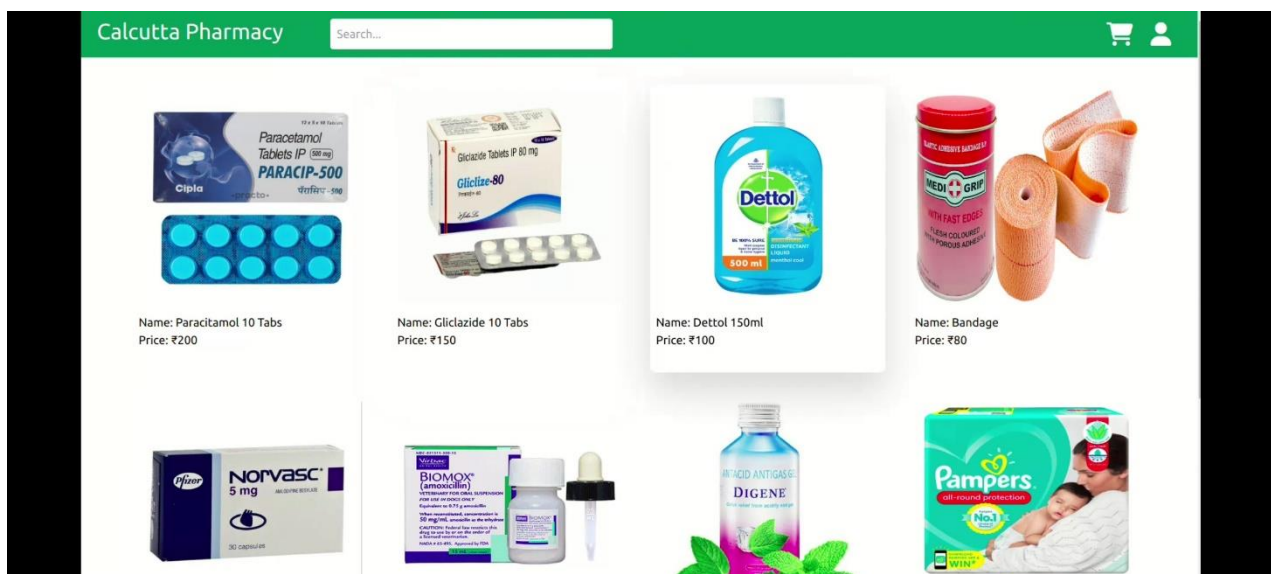

1. User Information Fields:

- Collects essential information such as name, email address, and contact details.

2. Username and Password Creation:

- Users choose a unique username and set a secure password.

C. Item Page Documentation:

Purpose: The item page displays detailed information about a specific pharmaceutical product, aiding users in making informed purchase decisions.

Key Features:

1. Product Details:

- Comprehensive information about the product, including name, description, dosage, and manufacturer.

2. Price and Availability:

- Clear indication of the product's price and current stock status.

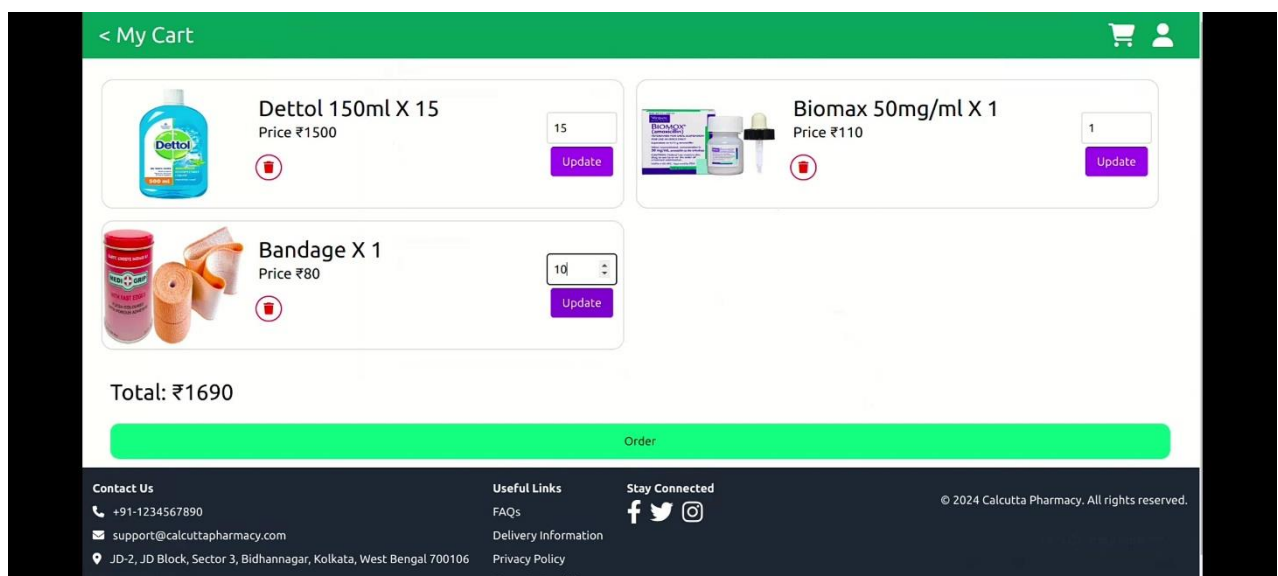

3. Images and Multimedia:

- High-quality images and possibly videos showcasing the product.

4. Add to Cart Button:

- Enables users to add the item to their shopping cart for subsequent purchase.

D. Cart Page Documentation:

Purpose: The cart page displays a summary of selected items, allowing users to review and proceed with the checkout process.

Key Features:

1. Item Summary:

- A list of all items added to the cart, including quantity and individual prices.

2. Subtotal and Total:

- Calculation of the subtotal and total cost, including any applicable taxes or fees.

3. Update Quantity and Remove Items:

- Users can adjust the quantity of items or remove them from the cart.

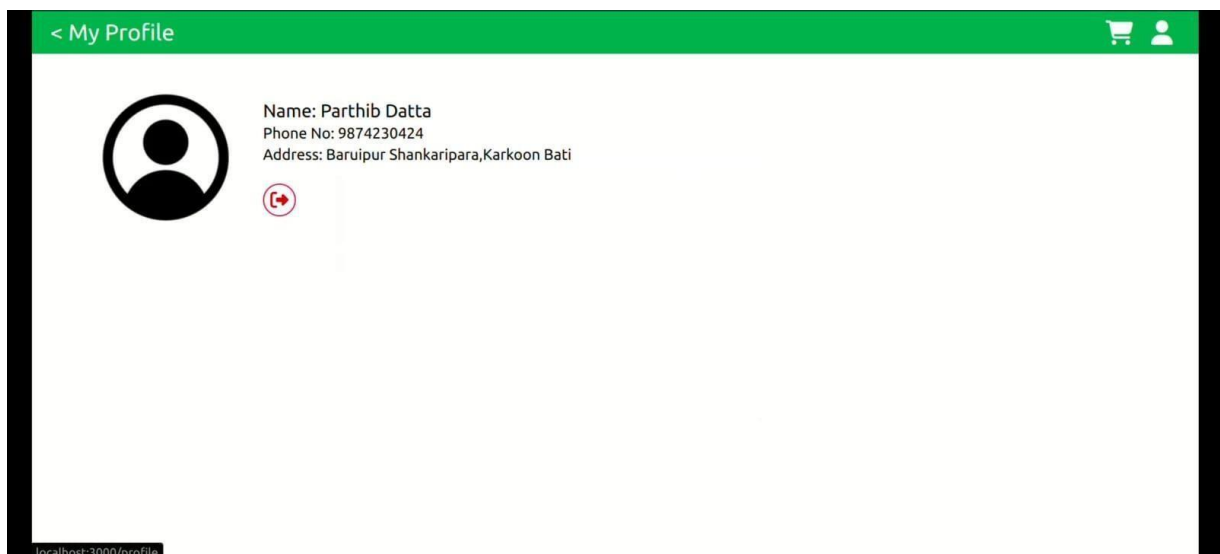

4. Continue Shopping:

- Option to return to the item page and add more products.

5. Proceed to Checkout:

- Button to initiate the checkout process and finalize the purchase.

E. Customer Profile Page Documentation:

Purpose: The customer profile page serves as a personalized hub where users can manage their account information, track order history, and customize preferences.

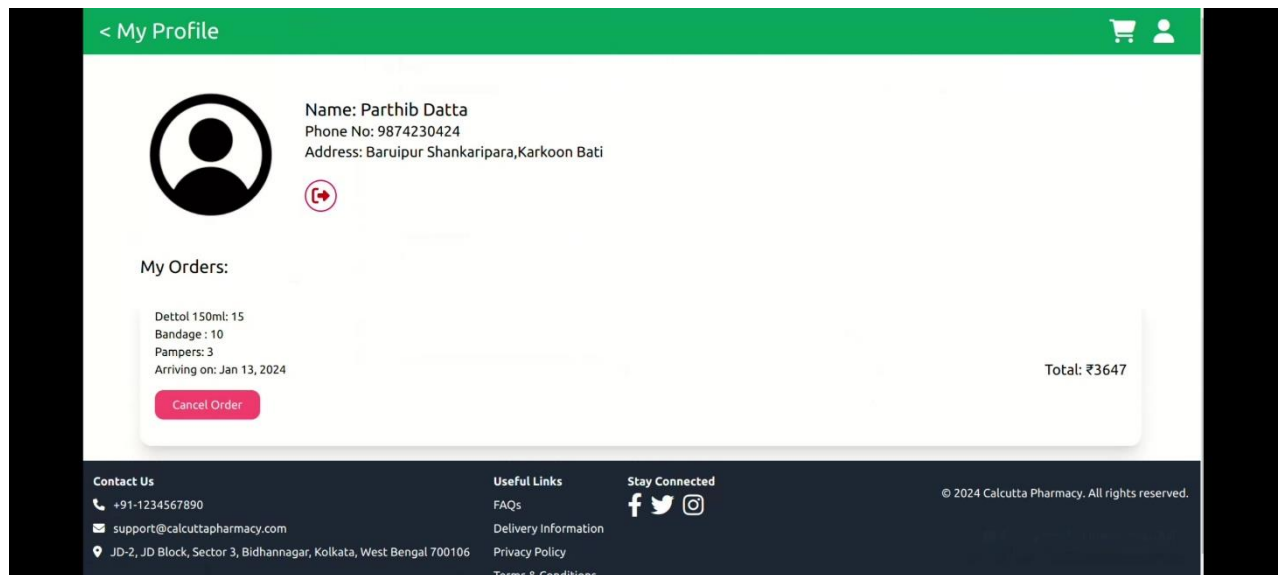

Key Features:

1. Account Information:

- Displays and allows users to edit personal details such as name, email address, and contact information.

2. Shipping Addresses:

- Users can add, edit, or remove shipping addresses for convenient order fulfillment.

***To Start:**
